

Removable Denture Post Op Instructions

Dentures/Partials

- **Try to wear your new denture/partial as much as you can. You may only be able to wear it a few hours a day at first as you get used to it.**
- **If you develop a sore area, contact us immediately so we can adjust the denture/partial.**
- **Warm salt-water rinses can help any sore areas you may develop.**
- **Make sure you remove your partial when you brush your teeth.**
- **Rinse your denture/partial after eating.**
- **Place your denture/partial in clean water every night. It is important to give your gum tissue time to rest. You may add denture cleaner tablets to the water.**
- **Keep your denture/partial away from dogs and cats, as they can eat and destroy the appliance.**
- **Wearing a denture/partial requires time and patience to get used to your new appliance.**
